

Terms and conditions: Zapmap Premium spring charging discount

- Both new and existing Premium subscribers are eligible for a 5% promotional discount on charging, running until the end of June.
- During the promotional period, Premium subscribers (existing and new) will receive a 5% discount off the kWh price when paying for charging via Zap-Pay, up to a usage cap of 50 kWh per month.
- If you exceed the usage cap, or cancel your Premium subscription, you can continue to use Zap-Pay but the 5% discount will no longer be applied. The usage cap will reset on the 1st of each month.
- There are no additional charges on top of your subscription to Zapmap Premium.
- The 5% discount only applies to the kWh cost and connection fees. If the discount is applied to an additional fee e.g. parking or overstay, we will notify you via email and arrange for this to be settled via another method.
- The total amount saved will be shown on your receipt, which will be sent to your registered email address on completion of your charging session. You can also view this by selecting the charging session in the 'Zap-Pay history' section of the app, located within the Settings menu.
- The discount will be applied once the charging session is complete, and the price shown pre and during charging sessions will not reflect this discount.
- Zapmap reserves the right to remove users who are suspected of foul play (e.g. unpaid sessions), or to end the promotion at any time.
